

Academic Proficiency in NYC Charter Schools

2019
2020

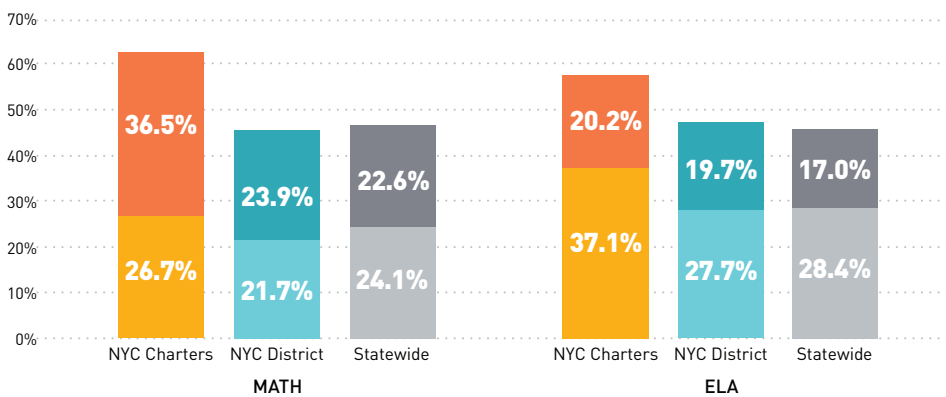

Public charter schools are accountable for the academic proficiency of their students. Charter school students must master the same New York state standards and take the same state assessments as other public school students.

- Overall, charter schools in NYC significantly exceed state and district proficiency rates in math (63.2% proficient to 45.6% for district students) and in ELA (57.3% proficient to 47.4% for district students).
- In Central Brooklyn, Harlem and the South Bronx, charter schools outperform district schools by significant margins in both math and ELA.
- Economically disadvantaged students in NYC charter schools greatly outperformed their district peers.
